

Managing Change in Crop Production

SDSU Plant Diagnostic Clinic

The SDSU Plant Diagnostic Clinic provides many services to diagnose agricultural and horticultural plant problems. Farmers, consultants, nursery managers, homeowners and others are encouraged to submit good plant samples for diagnosis and management recommendations.

Clinic website:

- <http://plantsci.sdstate.edu/planthealth/subpage.cfm?ID=12>
 - Online forms—just print and submit with your sample.
 - Mailing suggestions.
 - Fees and other information.

Specializing in:

- wheat, soybeans, corn, and other field crops
- ornamentals and vegetables
- turfgrass diagnosis

Tests offered:

- virus testing (serological)
- fungal and bacterial culture and identification
- mycotoxin testing (limited)

For more information or sample submission:
